

```
export default {
  name: 'car',
  title: 'Car',
  type: 'document',
  fields: [
    {
      name: 'id',
      title: 'Id',
      type: 'number',
    },
    {
      name: 'name',
      title: 'Name',
      type: 'string',
    },
    {
      name: 'type',
      title: 'Type',
      type: 'string',
    },
    {
      name: 'brand',
      title: 'Brand',
      type: 'string',
    },
    {
      name: 'fuel_capacity',
      title: 'Fuel Capacity',
      type: 'string',
    },
    {
      name: 'transmission',
      title: 'Transmission',
      type: 'string',
    },
    {
      name: 'seating_capacity',
      title: 'Seating Capacity',
      type: 'string',
    },
    {
      name: 'price_per_day',
      title: 'Price Per Day',
    },
  ],
}
```

## Car Schema

```

        type: 'string',
    },
    {
        name: 'original_price',
        title: 'Original Price',
        type: 'string',
    },

    {
        name: 'image_url',
        title: 'Image URL',
        type: 'url',
    },
    {
        name: 'image_local',
        title: 'Image local',
        type: 'string',
    },
    {
        name: 'likecar',
        title: 'like',
        type: 'boolean',
    },
    {
        name: 'tags',
        title: 'Tags',
        type: 'array',
        of: [{ type: 'string' }],
    },
],
};

```

Create Schema as per given API. And two new field [likecar] and [image\_local]
